

# The Power Behind The Toughest Physics Challenges.

The world leader in RF and EMC test instruments provides the amplifiers and modules to power even the most critical physics challenges.

AR Modular RF has RF power amplifiers and modules uniquely designed for **RF Heating, Ultrasonics, NMR, Sputtering and Plasma Cleaning**. Modules cover the .3 MHz to 5 GHz spectrum, 6 – 500 watts. You can add a combiner for up to 3,000 watts.

AR RF/Microwave Instrumentation offers a broad range of VSWR-tolerant RF solutions from **Lab Test Equipment** to power supplies for **Physics Experimentation**. With our newest amplifiers – the **800A3, 1500A3** and **5000A3** (each covering the frequency range of 10 kHz – 3 MHz) – you can select output impedance to match load impedance. This innovative amplifier is available in 800, 1500 or 5000 watts.

AR supplies a multitude of unique RF solutions for automotive, communications, military and scientific applications worldwide. Our limitless support network reaches the far corners of the world; and AR products are backed by the best and most comprehensive warranty in the business. AR is here to help you – today, tomorrow and always.

Let us help you find your physics solution. Call AR RF/Microwave Instrumentation at 215-723-8181 or AR Modular RF at 425-485-9000. We also invite you to visit us at [www.ar-worldwide.com](http://www.ar-worldwide.com)
