

MODEL AR-35
35 WATTS CW
35 WATTS PEP
30 MHz - 512 MHz, Multi-Band
Automatic Band-Switching

The Model AR-35 is a portable, lightweight, waterproof, fully automatic band-switching RF booster amplifier for multi-band VHF/UHF Tactical Radio equipment employing legacy, proprietary and emerging waveforms. The amplifier covers the frequency band of 30-512 MHz using six high speed auto switching filters to assure harmonic suppression and is SINCGARS, HAVE QUICK, and ECCM compatible. The amplifier includes Voltage Spike Suppression, RF sensing, T/R switching, Automatic Level Control (ALC), six automatically switched harmonic filter bands (DAMA capable), and protection against antenna mismatch and over-temperature. Protection against accidental polarity reversal is also provided. Low current on standby due to “sleep mode” greatly extends battery life in field use. The amplifier comprises a rugged submersible 2-piece aluminum case. Optional Broadband Antenna, cables and tactical vest pouch are available.

- Radio Vendor independent design. Single and multi-band radio compatible with just an RF connection
- 35 W CW across the entire 30–512 MHz band
- Low RF input power for full 35 W CW output
- Super low “sleep mode” standby Rx power drain
- High speed filter switching in SINCGARS, HAVE QUICK, and ECCM modes to assure interference free operation
- DAMA capable
- Battery and Vehicle power compatible, 12 and 24 volt systems. Filtered and DC transient protected
- Waterproof (Submersible)
- 3 year Warranty from a company with 35+ years in the business
