

At AR Modular Our Approach To Booster Amps Can Be Summed Up In Three Words... Less Is More.

Creating booster amplifiers that are smaller in size, quick to respond and easy to use was our challenge.

The AR-20: 20-watt and KMW1031 amps were the results. Dependable, tough,

and simple. No buttons.

Nothing to adjust, just plug it in and talk.

From a portable manpack battery, to a vehicle power supply.

From anywhere. Any time. We can even customize existing modules to match your needs.

AR products are backed by the best and most comprehensive warranty in the industry; and by a global support network that reaches the far corners of the world.

To learn more, call AR Modular RF at 425-485-9000.
