

Some Families Are Better At Communicating Than Others.

Our family of booster amplifiers extend range, enhance clarity and support uninterrupted communication. They work with multiple waveforms and make for more reliable networking. And with all their advanced technology, they're simple to operate.

You know that maintaining clear communications in battle conditions is critical. It can save lives and help achieve victory. So don't send your troops out with anything less than AR Modular RF booster amps. For lightweight manpack, for vehicle-mount, for saving lives and advancing missions, your troops need booster amps by AR Modular RF.
